BOOK YOUR
DEMO NOW!

Connectivity as a service

Do you want to know if connectivity as a service is a good option for your company?

Now it is easier than ever! We make it available to you in a live demo made from our Innovation Center in Spain. Try all the advantages offered by SD-WAN and SD-BRANCH in just one session.

- Experience first-hand all the advantages of connectivity as a service.
- Exclusive access to a complete demo environment, managed by our engineers.
- You choose the format: live or virtual demo sessions available.
- Now free of charge!

Deutsche Telekom Global Business

Connectivity as a service

By Deutsche Telekom Global Business

Powered by Cisco Meraki

Find out how our software-defined solutions will help to transform your business. An experience session for yourself and your colleagues lasts approximately 2 hours and is designed for IT managers, infrastructure managers and network administrators.

Content included:

- Experience how an extended visibility gives you a more precise control over your network.
- Network Orchestration – flexibly make registrations and changes in any element of your environment
- Deploy end-to-end security

Cisco Meraki Competence Center

- Design, deployment and operation of our connectivity as a service solution is based on Cisco Meraki platform.
- Includes different connectivity modules as SD-WAN, SD-LAN, WiFi, IoT and Security.
